

Amendments to and Listing of the Claims:

Please cancel claims 9 and 15-18, amend claim 1 and add new claims 19-25, so that the claims read as follows:

1. (Currently Amended) A packaging wrap for meat products, ~~in particular for boiled ham or boiled pickled products,~~ comprising a non-tubular, flat foil, which is insoluble in water, suitable for a cooking process, and permeable to gas, steam and/or smoke, ~~against whose side facing away from a meat product to be packaged therein can be placed a net for increasing strength,~~ wherein the foil is configured without a net as a thin-walled, flexible, non-collagen, fibrous foil having a maximum area weight of about 120 g/m^2 and the foil having an anti-adhesive coating on a side of the foil which will face a ~~its side facing the meat product to be wrapped with the foil,~~ the anti-adhesive coating comprising a material that is safe in accordance with food packaging regulations and prevents a the meat product to be wrapped with the foil from binding with the packaging wrap.

2. (Previously Presented) The packaging wrap according to claim 1, wherein the fibrous foil has an area weight of about 3 to 80 g/m^2 .

3. (Previously Presented) The packaging wrap according to claim 1, wherein the anti-adhesive coating comprises a material selected from the group consisting of viscose, silicone, wax, and polyethylene.

4. (Previously Presented) The packaging wrap according to claim 1, wherein the anti-adhesive coating has an area weight of about 0.5 to 100 g/m^2 .

5. (Previously Presented) The packaging wrap according to claim 1, wherein the anti-adhesive coating at least predominantly covers the fibrous foil.

6. (Previously Presented) The packaging wrap according to claim 1, wherein at least one of the anti-adhesive coating and the fibrous foil is water impermeable.

7. (Previously Presented) The packaging wrap according to claim 1, wherein the anti-adhesive coating is permeable to gas, steam and/or smoke.

8. (Previously Presented) The packaging wrap according to claim 1, wherein the anti-adhesive coating is impermeable to gas, steam and/or smoke and has gaps provided therein.

9. (Cancelled).
10. (Previously Presented) The packaging wrap according to claim 1, wherein the fibrous foil is selected from the group consisting of woven, knit, fleeced, and non-woven fabrics.
11. (Previously Presented) The packaging wrap according to claim 1, wherein the fibrous foil comprises fibers selected from the group consisting of cellulose fibers and synthetic fibers, which are processed into a woven, knit, fleeced or non-woven fabric.
12. (Previously Presented) The packaging wrap according to claim 1, which is pricked or perforated.
13. (Previously Presented) The packaging wrap according to claim 1, which is impregnated with a material selected from the group consisting of liquid seasonings, liquid flavors and liquid smoke.
14. (Previously Presented) The packaging wrap according to claim 1, which is imprinted with edible color.
- 15.-18. (Cancelled).
19. (New) The packaging wrap according to claim 1, further comprising a separate net lying against a side of the foil which will face away from a meat product to be wrapped.
20. (New) The packaging wrap according to claim 19, wherein the fibrous foil is wrapped around a meat product, and the net is stretched over the meat product wrapped in the foil.
21. (New) The packaging wrap according to claim 20, wherein the meat product is a boiled, pickled product.
22. (New) The packaging wrap according to claim 20, wherein the meat product is boiled ham.
23. (New) The packaging wrap according to claim 20, wherein the foil is wrapped around the meat product so that edges of the foil slightly overlap.
24. (New) The packaging wrap according to claim 5, wherein the anti-adhesive coating has gaps therein which permit the escape of gases occurring during the cooking process.

25. (New) The packaging wrap according to claim 1, wherein the foil is sufficiently flexible for wrapping coarse-pieced meat products.
